CAREER OBJECTIVE

Computer Science Engineering student skilled in Python, Machine Learning, and Full Stack Development. Experienced in building web applications using Flask, MySQL, and Scikit-learn. Strong in problem solving, data structures, and software development fundamentals.

TECHNICAL SKILLS

Languages: Python, Java, C

Web Technologies: HTML, CSS, JavaScript, Flask

Databases: MySQL, SQL

Libraries/Frameworks: Pandas, NumPy, Scikit-learn

Tools: Git, GitHub, Spyder, VS Code

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning

PROJECTS

Automated Loan Approval Prediction System

- ML classification pipeline using Python, Pandas, and Scikit-learn for loan eligibility prediction.
- REST API using Flask for real-time inference and deployed on Render.
- Applied feature engineering and model evaluation achieving ~80% accuracy.

E-Voting System

- Developed secure web-based voting system using HTML, CSS, JS, MySQL
- Implemented login authentication, vote casting, and result generation
- Ensured secure and transparent voting process with database management

Student Feedback System

- Built desktop-based feedback system using Python and Tkinter
- Designed GUI for collecting and managing student feedback
- Improved feedback collection efficiency through digital system

EDUCATION

B. Tech CSE | GNITC | CGPA: 8.85 | 2023–2027

Intermediate | 98.5%

SSC | 98%

CERTIFICATES & ACHIEVEMENTS

- Hack Arena– National Hackathon (Level 2): Recognized for presenting a remarkable idea under the Open Innovation theme.

Soft Skills

- Problem Solving
- Team Collaboration
- Effective Communication
