SANIYA BEGUM

Kollapur, Telangana | +91 8639692635 | saniyabegum.tech@gmail.com
Portfolio | GitHub | LinkedIn | HackerRank

PROFESSIONAL SUMMARY

Computer Science and Engineering student skilled in Java, Spring Boot, Python, and MySQL, with hands-on experience building full-stack, AI, and machine learning applications. Seeking software development opportunities to apply strong problem-solving skills and build scalable solutions.

EDUCATION

B. Tech CSE | GNITC | CGPA: 8.85 | 2023–2027
Intermediate | 98.5%
SSC | 98%

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Web Technologies: HTML, CSS, React.js

Databases: MySQL

Frameworks & Backend: Spring Boot, Flask, Spring Data JPA

Core Concepts: OOP, REST APIs, DSA, DBMS

AI/ML: Machine Learning, Gemini AI

Development: REST APIs, JWT Authentication, Role-Based Access Control

PROJECTS

AI Job Portal | GitHub | Live Demo

Java, Spring Boot, MySQL, Gemini AI, JWT

- Developed a full-stack AI-powered job portal using Java, Spring Boot, MySQL, Gemini AI, and JWT, supporting student/recruiter authentication, job posting, search, applications, and tracking.
- Built REST APIs with Spring Boot and JWT-based role-based access control, and integrated Spring Data JPA to manage users, jobs, and applications.
- Integrated Gemini AI for resume-job matching, skill-gap analysis, and personalized job recommendations.

AI Interview Assistant | GitHub | Live Demo

Python, Flask, Gemini AI, HTML, CSS, JavaScript

- Developed an AI-powered interview platform using Python, Flask, Gemini AI, HTML, CSS, and JavaScript for personalized technical and HR mock interviews.
- Built dynamic question generation and answer evaluation using Gemini AI, generating performance scores based on candidate responses and job descriptions.
- Provided personalized feedback and improvement suggestions to help candidates identify weaknesses and improve interview performance.

Automated Loan Approval Prediction System | GitHub | Live Demo

Python, Pandas, Scikit-learn, Flask

- Developed a machine learning web application using Python, Pandas, Scikit-learn, and Flask to predict loan eligibility from applicant financial and personal information.
- Performed data preprocessing, feature engineering, model training, and evaluation using a Decision Tree Classifier.
- Achieved approximately 80% prediction accuracy and deployed the Flask application on Render for real-time loan eligibility predictions.

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle
- HackerRank SQL (Basic) Certificate – HackerRank
- Hack Arena – 2nd National Level Hackathon – IEEE Student Branch, Guru Nanak Institutions (2024)
